

## Consent Form

Dear Students,

The researcher conducts a scientific study aimed to explore the level of global citizenship skills among students at Qatar University. This research aims to identify the availability of global citizenship skills among Qatar University students and explore the role of Qatar University in developing the skills of global citizenship among its students to achieve Qatar Vision 2030.

The sample of this study 1000 students will selected randomly from all colleges students in Qatar University.

In terms of inclusion criteria, participants (randomly selected) must all be enrolled in Qatar University for the semester in which the research is approved by IRB committee. Any male or female student who is not enrolled in any of the colleges at Qatar University will be excluded from the study. Similarly, inclusion will be for the academic year in which the study is intended to be applied; after obtaining IRB approval for the research. Else, there are no specific inclusion and exclusion criteria.

There is no direct benefit to the researcher for participating in this study .

Regarding the study procedure you are invited to participate, so please kindly answer the Likert five points scale questionnaire/survey in an honest and objective manner, knowing that the answer to this questionnaire will only take 30 minutes, and you can inquire about any point during the answer by communicating with the researcher.

It needs to be informed that your confidentiality will be our priority; hence, your name and/or any special information about you will be mentioned anywhere.

Your participation in this study is voluntary, you are free to refuse or stop at any time, and you will not be affected in any way if you decide to stop. However, there is no risk in participating in this study. Unwillingness to participate in the study and/or withdrawal from the study will not in any way interfere with the student-instructor relationship or affect student? course grades assessment. Similarly, participation in the study will not in any way interfere with the student-instructor relationship or affect students. course grades assessment.

All data will be treated in strict confidence and will be used for scientific research purposes only and will be destroyed after three years of completion. Anyway, your personal information and identity will remain hidden and confidential even for the researcher himself and the information that you will provide will be treated with absolute confidentiality by the researcher.

There is no harm to the participants because you have the right to withdraw from participation at any time and at any stage of the research.

The benefit of this research on the topic of how global citizenship is integrated at the undergraduate level provides opportunities to initiate important discussions among faculty, program administrators, students and other key stakeholders about global citizenship definition and development of learning goals outcomes. Research discussions are critical in the beginning to gain understanding and consensus regarding how colleges and universities provide students with knowledge and skills to make informed career, personal, and civic decisions as global citizens today.

Approved Date: March 1, 2022  
Qatar University Institutional Review  
Board (QU-IRB)

The result of this study may contribute to a larger understanding of how education at the undergraduate level can provide the proper environment and condition to create experiences that lead to

transformative learning in regards to global citizenship. The study may prove helpful in answering questions and addressing existing gaps in research and writing about global learning and citizenship and may provide valuable insight into understanding elements that facilitate transformative learning in undergraduate students.
